Professional Summary

Front-end Developer with 4+ years of professional experience specializing in React.js, Next.js and modern front-end technologies, Experienced in building scalable, high-performance applications, integrating RESTful APIs, and collaborating within agile teams, Strong focus on clean architecture, reusable components, performance optimization, and cross-browser compatibility.

Professional Experience

Ibrahim Al-Blooshi Website – Educational Violin Platform — Sep 2025 – Oct 2025
Freelancer — part Time – Oman

• Designed and developed a full-featured educational website for learning the violin, with clear steps and practical exercises.
• Implemented a multilingual platform to cater to users from different language backgrounds
• Integrated a content management dashboard allowing adding and playing music directly from the panel
• Created a dedicated section to display the music tracks added by the admin
• Developed a system to manage and display available courses for each user dynamically
• Focused on delivering a smooth and interactive user experience (UX)

Web Application Developer (React.js, Next.js, Tailwind css) — Nov 2025 – Present
Spped — Full Time - Sudia

• Enabled dynamic management of exchange rates, transfer methods, and payment options through the Admin Dashboard with real-time synchronization between the web platform and mobile application via API integration, without requiring frontend code changes.
• Implemented full integration between the website, admin panel, and mobile application ensuring real-time data consistency across all platforms.
• Built centralized API-based architecture to reflect dashboard updates instantly across all connected systems.
• Developed a dedicated section allowing users to download the mobile application directly from the website, fully integrated within the platform ecosystem.
• Managed frontend state efficiently using Context API, and custom React Hooks, ensuring predictable and mintinable application behavior.
• Deployed the platform on a secure subdomain via cPanel; access is restricted for confidentiality purposes.
• Developed an Investment Web Platform to showcase companies and investment opportunities in a structured and user-friendly way.
• Enabled users to browse companies and explore detailed information about each investment.
• Designed a simple and clear navigation system for seamless movement between different sections.
• Focused on delivering an intuitive and smooth user experience (UX).

Web Application Developer (Vue.js, Bootstrap) — Oct 2024 – Oct 2025
Developer Plus — Present Full Time – Gaza

• Developed the Rahma & Ihsan Association platform from scratch, delivering a complete and scalable web solution.
• Built responsive and user-friendly interfaces compatible with all screen sizes and devices.
• Managed both frontend development and backend integration, ensuring smooth data flow and system stability.

• Implemented secure online donation and payment systems to support charity operations.
• Improved website performance through SEO optimization and structured content management.
• Added backend meta tags and enhanced website indexing for better search engine visibility.
• Collaborated closely with stakeholders to implement updates and new features based on project requirements.

Web Application Developer (Vue.js, Nuxt.js, Tailwind css) — Oct 2024 – Present
Fadda Tech — Full Time - Gaza

• Developed the Rise Marketing Platform, delivering a modern and scalable web solution.
• Collaborated closely with the Fada Tech team throughout all development phases.
• Implemented clean, maintainable code following best practices in front-end development.
• Handled email functionality and system integrations efficiently.
• Utilized GitHub for version control and smooth team collaboration
