Professional Experience

Web Application Developer (React.js, Next.js, Tailwind css)   Nov 2025 – Present
Spped   Full Time - Sudia

• Enabled dynamic management of exchange rates, transfer methods, and payment options through the Admin Dashboard with real-time synchronization between the web platform and mobile application via API integration, without requiring frontend code changes.
• Implemented full integration between the website, admin panel, and mobile application ensuring real-time data consistency across all platforms.
• Built centralized API-based architecture to reflect dashboard updates instantly across all connected systems.
• Developed a dedicated section allowing users to download the mobile application directly from the website, fully integrated within the platform ecosystem.
• Managed frontend state efficiently using Context API, and custom React Hooks, ensuring predictable and mintinable application behavior.
• Deployed the platform on a secure subdomain via cPanel; access is restricted for confidentiality purposes.

Web Application Developer (React.js, Next.js, Tailwind css)   Nov 2025 – Present
Spped   Full Time - Sudia

• Developed an Investment Web Platform to showcase companies and investment opportunities in a structured and user-friendly way.
• Enabled users to browse companies and explore detailed information about each investment.
• Designed a simple and clear navigation system for seamless movement between different sections.
• Focused on delivering an intuitive and smooth user experience (UX).

Web Application Developer (Vue.js, Bootstrap)   Oct 2024 – Oct 2025
Developer Plus   Present Full Time – Gaza

• Developed the Rahma & Ihsan Association platform from scratch, delivering a complete and scalable web solution.
• Built responsive and user-friendly interfaces compatible with all screen sizes and devices.
• Managed both frontend development and backend integration, ensuring smooth data flow and system stability.
• Implemented secure online donation and payment systems to support charity operations.
• Improved website performance through SEO optimization and structured content management.
• Added backend meta tags and enhanced website indexing for better search engine visibility.
• Collaborated closely with stakeholders to implement updates and new features based on project requirements.

Web Application Developer (Vue.js, Nuxt.js, Tailwind css)   Oct 2024 – Present
Fadda Tech   Full Time - Gaza

• Developed the Rise Marketing Platform, delivering a modern and scalable web solution.
• Collaborated closely with the Fada Tech team throughout all development phases.
• Implemented clean, maintainable code following best practices in front-end development.

• Handled email functionality and system integrations efficiently.
• Utilized GitHub for version control and smooth team collaboration

---
